Dear Neighbor,

Yesterday, City Council took up the issue of campaign finance regulations and other housekeeping items brought up by the Ethics Review Board (ERB). Given the complexity of yesterday's vote regarding campaign finance and disclosure, I want to be abundantly clear that I am and have been in full support of the original recommendations made by the Ethics Review Board (ERB). The ERB kept transparency and the public's trust top of mind throughout their review process, and each recommendation put forth received ample vetting and broad public support. The City Council should not be in the business of developing its own rule book.

The City Council was scheduled to vote to approve or deny amendments to the land use categories yesterday. However, I pushed to delay a vote on the matter until you have an opportunity to learn more about how these changes could impact your community. Stay tuned for more information about community input meetings from my office.

In closing, District 1 lost a great neighbor last week. Mr. Richard Acosta worked diligently to improve the Los Angeles Heights neighborhood over the years. I will always treasure our conversations about various policy issues. Thank you for helping District 1, sir. You will be missed.

Have a great week!

Sincerely,

Roberto C. Treviño
City Councilman
District 1

P.S. The City Council will not meet in July. However, both staff and myself will be available to you. Please call (210) 207-0900 or email District1@sanantonio.gov.

Councilman Treviño commends Mayor's Housing Task Force recommendations

On Wednesday, the Mayor's Housing Task Force recommended expanding the Under 1 Roof program citywide. The program, which was initiated by Councilman Roberto Treviño in 2015, replaces the old, deteriorating roofs of qualifying homeowners with new, high-reflectance roofs. Councilman Treviño provided the following statement:

"Thank you to the Mayor's Housing Task Force for recognizing the value of Under 1 Roof to aging and disadvantaged homeowners.

The Under 1 Roof Program data is clear - a high-reflectance roof provides numerous benefits: it ensures a solid, leak-free roof overhead, reduces energy consumption which lowers utility bills and saves money - both of which improve the quality of life for the resident. These savings allow more dollars for people to use to offset cost of living increases, medication expenses, and groceries. Additionally, based on the success of the pilot program in District 1, CPS Energy developed a rebate program for homeowners who install high-reflectance roofs.

As the housing landscape continues to evolve, San Antonio needs robust strategies like the Under 1 Roof program to protect low income and senior homeowners as they are the most vulnerable to housing insecurity. This program perseveres our most affordable housing and the recommendations put forth today by the Task Force give me confidence that San Antonio will address affordable

housing in an innovative and equitable manner."

To date the program has replaced a total of 176 roofs.
